HIPAA Compliance for Health Plans

HIPAA One™

Advantages:

✓ Step-by-step guided approach to compliance

✓ Up-to-date software including citations for HIPAA and NIST

✓ Access to our certified Assessors

Enhanced Capabilities:

✓ Automated task reminders

✓ Send pre-filled questions to your business units and locations

✓ Manage all SRAs in one place — no more juggling spreadsheets!

✓ Calculated risk assignment and prioritization

✓ Remediation tracking and action history

✓ Real-time reporting and final reporting

✓ Year over year import of prior assessments

Efficient, Cost-Effective Way to Achieve HIPAA Security and Privacy Compliance

Under HIPAA, Health Plans have the responsibility to safeguard protected health information. This can require a significant investment of time, money, and resources, especially if you are using spreadsheets and emails to manage compliance across your enterprise.

Simple and automated, our security, privacy, and breach risk software removes the administrative burden of compliance, allowing you to manage, monitor, report, and track compliance all in one platform.

The HIPAA One™ software follows the OCR Audit Protocol and is based on NIST-methodologies.

Audit once, report many. We understand how important it is to be able to respond and provide accurate data and updates. Our software allows you to download customized reports with as much or as little information as you need.

Immediate Remediation. Answer questions in the software and with the click of a button, a remediation plan is created. Within the plan, risks are automatically rated by severity and can be delegated to specific individuals to remediate.

Less time chasing data. Spend more time in the software and no time in spreadsheets, documents, and emails. Everything can be updated, tracked, and reported directly from the platform.

Compliance and data security are more important than ever before. Holistically address security risk management and HIPAA compliance across the continuum of your organization with HIPAA One.

Delivering the Structure to Be Successful:

- Evaluate HIPAA/HITECH compliance
- Document current state of security controls
- Meet Meaningful Use requirements
- Identify gaps that pose business risks
- Create a practical remediation roadmap
- Establish a sustainable operating model for information security and privacy

Benefits of Security and Risk Assessments:

- Identify threat sources and events
- Identify vulnerabilities
- Determine likelihood of breach occurrence
- Determine magnitude of impact
- Understand your risk

Many states have specific privacy laws health plans are required to follow. Our software is up to date with all the latest state specific laws and regulations. No need to worry, *we have you covered.*

OUR ASSESSMENT PROCESS

1
Information Gathering

2
Assessment, Planning, and Remediation

3
Finalized Report and Action Plan
