NIST Cybersecurity Framework Assessments

## Build a Forward-Thinking Security and Privacy Program

Adopting the NIST Cybersecurity Framework (NIST CSF 2.0) for identifying cybersecurity risks in conjunction with the NIST Risk Management Framework offers organizations a "common language" for measuring cybersecurity and privacy risks, and provides a clear method for communicating compliance and risk posture to stakeholders.

Intraprise Health, a Health Catalyst Company, offers a NIST Framework Assessment Platform that helps organizations adopt the NIST CSF Framework, identify and prioritize cybersecurity risks, and measure their impact on the overall security posture.

Through the platform, organizations can better identify, manage, and improve their cyber risks, placing them in a stronger position to govern, identify, protect against, detect, respond to, and recover from attacks.

Highlights

- Comprehensive software that is easy to use
- Cross team delegation capabilities enhance productivity
- Dashboards to measure, visualize, and analyze NIST CSF security risks and maturity
- Vulnerability scan a small number of externally facing IPs to gather technical risks
- Access to experts for remediation planning and implementation

Our Platform Differentiators

NIST Framework Assessment Platform Capabilities

✓ Developed and supported by our team of NIST experts, this solution is designed for fast and easy implementation.

✓ Identifies gaps in your programs by comparing them against self-selected maturity targets and best practices, ensuring a tailored approach to your organization's needs.

✓ Two implementation options: Self and Managed Service

✓ Digital validation certificate provided with meaningful reports

Our Service Differentiators

Intraprise Health Assessor Support and Expertise

✓ NIST experts with understanding of NIST CSF and NIST Risk Management Framework (RMF) requirements

✓ Certified cybersecurity specialist with deep healthcare expertise, delivering advanced protection.

✓ Assessors to review assessment and provide recommendations to help advance your organization's maturity level

Our NIST Framework Assessment Offerings

You can complete a NIST CSF Security Assessment independently using the Intraprise Health NIST Framework Assessment Platform, or if you would like additional validation assistance, our expert assessors will work with you to complete your assessment, answer questions, and provide strategic and tactical support.

Self Assessment

Managed Services Assessment
